Product description

Guideline for storage and temporary storage for drip trays with regard to fire safety, occupational safety and environmental safety according to PGS 15 (publication series hazardous substances):

A storage facility must be constructed in such a way that leaked or spilled hazardous liquid is collected in a container. To this end, the collection container must have a capacity of at least 110% of the largest package. However, if 10% of the total content of the packages is more than 110% of the content of the largest package, then the collection capacity must be equal to 10% of the total content of the packages together. The collection container must be sufficiently resistant to the stored liquids.

The collection capacity only applies to liquids. Empty, uncleaned packaging does not count. The collection facility may also be realized in storage. The choice of location for the collection facility may depend on the hazardous liquids stored. Kruizinga.nl is not liable for the type of use!

Please note! Any form of modification is not allowed. If this is the case, all regulations will lapse.

Specifications

Article arrangement: New
Version: for 1-4 200 l drums

Walls: flat steel plate

Top: 1000kg/m²

Colour: blue

Surface treatment: painted

Width (mm): 1460

Insertion height (mm): 100

Weight (kg) 144

Type number: 404

EAN Code (Gtin) 8719424006261

Type: receptacle for drum

Material: steel

Floor: with galvanised grid

Subgroup: retention basin steel

Ral colour: 5012

Length (mm): 1460

Height (mm): 355

Loading capacity (kg): 855

Collection volume (ltr): 525

Additional specifications: StawaR approved (DE)
