## Technical information

**Productnumber : 404W-800**

### Product description

Guideline for storage and temporary storage for drip trays with regard to fire safety, occupational safety and environmental safety according to PGS 15 (publication series hazardous substances):

A storage facility must be constructed in such a way that leaked or spilled hazardous liquid is collected in a container. To this end, the collection container must have a capacity of at least 110% of the largest package. However, if 10% of the total content of the packages is more than 110% of the content of the largest package, then the collection capacity must be equal to 10% of the total content of the packages together. The collection container must be sufficiently resistant to the stored liquids.

The collection capacity only applies to liquids. Empty, uncleaned packaging does not count. The collection facility may also be realized in storage. The choice of location for the collection facility may depend on the hazardous liquids stored. Kruizinga.nl is not liable for the type of use!

Please note! Any form of modification is not allowed. If this is the case, all regulations will lapse.

### Specifications

Article arrangement: New  
Version: for 1-4 200 l drums  
Walls: walls closed  
Top: 1000kg/m<sup>2</sup>  
Colour: blue  
Surface treatment: painted  
Width (mm): 1460  
Insertion height (mm): 100  
Weight (kg) 165  
Type number: 404  
EAN Code (Gtin) 8719424006278

Type: receptacle for drum  
Material: steel  
Floor: with galvanized grid  
Subgroup: retention basin steel  
Ral colour: 5012  
Length (mm): 1460  
Height (mm): 525  
Loading capacity (kg): 1520  
Collection volume (ltr): 885  
Additional specifications: StawaR approved (DE)
