## Technical information

Productnumber : 40-RW-GR-2700-1

### Product description

This steel collection tray is suitable for placing under your rack. The capacity of the drip tray is 352 litres. The steel is painted blue and the grid is hot-dip galvanized with a mesh size of 30x60 mm.

Guideline for storage and temporary storage for drip trays with regard to fire safety, occupational safety and environmental safety in accordance with PGS 15 (publication series of hazardous substances):

A storage facility must be constructed in such a way that leaked or spilled hazardous liquid is collected in a container. To this end, the collection container must have a capacity of at least 110% of the largest package. However, if 10% of the total content of the packages is more than 110% of the content of the largest package, then the collection capacity must be equal to 10% of the total content of the packages together. The collection container must be sufficiently resistant to the stored liquids.

The collection capacity only applies to liquids. Empty, uncleaned packaging does not count. The collection facility may also be realized in storage. The choice of location for the collection facility may depend on the hazardous liquids stored. Kruizinga.nl is not liable for the type of use!

Please note! Any form of modification is not allowed. If this is the case, all regulations will lapse.

### Specifications

Article arrangement: New

Version: retention basins for shelf 2700

Walls: walls closed

Top: 1000kg/m<sup>2</sup>

Colour: blue

Surface treatment: painted

Width (mm): 1300

Volume (ltr): 352

EAN Code (Gtin) 8719424005943

Type: Retentions basin for shelf

Material: steel

Floor: with galvanized grid

Subgroup: retention basin steel

Ral colour: 5012

Length (mm): 2650

Height (mm): 210

Type number: 40-RW
