Technical information

Productnumber : 42.194.25.650

Product description

The Black Bull Protection Bar is an extremely robust, solid protection railing made of steel. It clearly separates roads (forklift truck and passenger transport) and offers the right protection of workplaces, equipment and buildings. Variable system consisting of posts and slats. Quick, easy installation, interlocking and no protruding lugs or bolts

The above article is a lath of 2000 mm long to combine with pillars of 70 cm wide. See linked articles below.

NOTE: This article is only suitable for indoor use!
