## Technical information

**Productnumber : 42.198.22.991**

### Product description

Steel scaffolding protection has been specially developed for the frontal protection of scaffolding against collision damage caused by forklift trucks and shunting traffic. Each set is individually adjustable in width (adjustable from 2300 to 2700 mm). Quick, easy installation, interlocking and no protruding lugs or bolts.

The striking yellow C-profile beams are made of 3mm thick high-quality steel. The corner profiles are made of 4 mm thick high-quality steel and provided with black signal stripes. The feet have drilled holes with a diameter of 14 mm.

Required mounting material (NOT included as standard - see to be combined with):

8 x universal plugs S12 with screw 8/100 (article number: 42.109.17.393) or

8 x push-through anchors for concrete floors 12/120 (article number: 42.109.24.665)

### Specifications

Article arrangement: New

Version: adjustable from 2300 to 2700 mm

Subgroup: Shelving protection

Surface treatment: plastic-coated

Height (mm): 465

Weight (kg) 58

Additional specifications: only suitable for indoor use!

Type: bumper protection

Material: steel

Colour: black/yellow

Width (mm): 2300

Depth (mm): 160

Type number: 42-VGR

EAN Code (Gtin) 8719424059687
