Product description

A 25-liter used warehouse container made of hot-dip galvanized steel is a robust storage container widely used in warehouses, workshops and industrial environments. The zinc coating provides an effective barrier against corrosive elements such as moisture and oxygen, significantly extending the life of the treated metal. This makes the storage bins suitable for harsh conditions. Designed with sturdy stacking edges, making them easy and safe to stack on top of each other. This allows efficient use of available space, keeping the warehouse organized and uncluttered. The grab opening on the front of the bin makes it easy to quickly access the contents even when the bins are stacked. This is useful for order picking and quickly finding needed items in the warehouse. Both the handle at the back and the grip bar at the top facilitate handling and moving the storage bins. This contributes to efficient logistics and transportation of goods within the warehouse or between different locations. Suitable for industries such as logistics, manufacturing, and distribution, where streamlined storage and easy access to materials are essential for efficient operations.

Specifications

Article arrangement: Used

Version: grip opening

Colour: colorless

Length (mm): 500

Width (mm): 310

Height (mm): 200

Volume (ltr): 25

Type number: 98-1319

Type: stackable

Material: steel

Surface treatment: galvanized

Internal length (mm): 450

Internal width (mm): 300

Internal height (mm): 190

Weight (kg) 4

EAN Code (Gtin) 8719424117523
