

Technical information

Productnumber : 55-WIEL-ZRR100

Product description

Castor Ø 100 mm rubber with brake to make type 55 storage racks mobile, allowing them to be moved easily. The running surface is rubber, which ensures good grip on various surfaces while providing shock absorbing properties, which is useful when moving loads on a storage rack. A load capacity of 90 kg per wheel which means it is capable of carrying heavy loads without collapsing, which is crucial for storage racks where weight distribution and stability are important. The brake provides additional safety and stability, especially when the storage rack needs to be locked in place to prevent shifting. The caster can rotate 360 degrees, making it easy to change the direction of the load even in tight spaces. The housing is made of galvanized steel, which ensures durability and resistance to corrosion. This is essential for long-term use, even in environments with humidity or exposure to various elements. Supplied with a mounting bracket and matching fasteners, making it easy to mount under the uprights of the storage rack.

Notice! Supplied per 1 piece!

Specifications

Article arrangement: New

Version: Ø 100 mm

Colour: colorless

Loading capacity (kg): 90

Additional specifications: incl. mounting bracket and mounting material

Type: castor wheel with brake

Material: rubber

Surface treatment: galvanized

Type number: 55-WIEL

EAN Code (Gtin) 8719424235524
